Robert J. Vermillion, CPP/Fellow
Certified, ESD & Product Safety Engineer-INARTE
RMV Technology Group, LLC
Clayton, CA. 94517
bob@esdrmv.com

Dear Bob:

On behalf of Cal Poly Industrial Technology program, we would like to express our gratitude for RMV's continued professional development of the annual Cal Poly ESD Certification Program which now supports the disk drive, medical device, pharmaceutical, space agency, semiconductor, automotive and defense industries. The feedback from engineering professionals in attendance has been nothing less than outstanding. Your depth of knowledge, know how and excellent presentation style with practical demonstrations have made the course a real success. Your use of interactive instrumentation in a "hands-on" format has been well received and truly supports our "learn-by-doing" philosophy at the University.

Due to the enthusiastic feedback of the organizations attending the ESD certification seminar, we would like to extend the course from a one day to a two day format for 2009. I would like to personally invite you to develop and teach the course again for a two day certification course on a bi-annual basis.

We appreciate your outstanding service and collaboration with Cal Poly in the development of an excellent professional development program! Again, thank you for your ESD and packaging engineering professionalism.

Sincerely yours,

Jay Singh,
Associate Professor
Packaging Program Director
